I've currently got a structure like this: - Project -- App --- Models --- etc. Where App is a dummy project, Models and etc. are projects I'm working on. I've noticed that every time I run the Clean Solution command on this structure, I get the following directory structure: - Project -- app --- models --- etc. What's confusing me is that this behavior is specific to lowercase-based directories and isn't apparent in uppercase directories. The only way I can reproduce it is to run "Clean Solution" from a VS 2017 command prompt. This is incredibly annoying, and I can't find any information online about what's causing it or how I might prevent it. Any ideas? A: This is a known issue with VS2017. The fix is here. Open the Visual Studio Installer. In the Select Features pane, select the Visual Studio Installer item and click Modify. In the Updates pane, select all the relevant Updates, click Install, and then click Close. Restart Visual Studio. You might want to go back and download the previous version (15.9) for a clean slate. A top-performing member of House Intelligence Committee Devin Nunes (R-CA) demanded an inquiry into Facebook over the use of Facebook data analytics, including to influence elections. Speaking to Brian Wilson of the Daily Caller on Tuesday, Nunes said, "The data used in the analysis should have been sourced from a non-Russian political data company. "It should have been cleaned of Russian data," said Nunes. "I believe it' 77a5ca646e
