I'll probably give up updating Nuendo on PC and. This unfortunately makes it impossible to connect to the PC with Mobiface on Cubase 5.32. New features Other than the features mentioned above, some notable improvements were made in Nuendo v.3.2. Most notable changes are: Expanded CD and DVD Support Audio discs no longer have to be imported as multi-CDs. Instead, the program will check whether a particular disc is an audio CD or a music CD and, if it is an audio CD, it will automatically check out the song. Exporting Music Cues Nuendo v.3.2 allows users to export out Audio Cues for the song they are working on, whether it is a song they are working on or a song they had already imported. This makes it easier for musicians to change. Simpler Audio Chops Within the Audio Chops window, many features were added. Users are able to play back a loop, undo a cut, or remove a loop and all in one single action. Restoration Mode Within the Restore window, users are able to save their current project and load it back up later with the possibility of undoing any undone cuts. Other Aside from the new features mentioned above, Nuendo v.3.2 also includes a minor update to the import/export files which allows users to import audio.wav and.mp3 files into Cubase SX and Nuendo.32. There is also a compatibility update for v.3.2 that improves sound quality in.wma files. v3.3 Released in June 2005, Nuendo 3.3 included the following
