[yt\_latest\_video id=mni0XGsnao] Farlanders Studio: The Farlanders is a beautiful platform game from the 90's. We all know that you don't see this kind of games anymore and we don't want that to happen to our game. We are making this game as a tribute to the old platform games. Farlanders: Our game is inspired by the game Ghosts and Goblins, and we want to create the same game in the Farlanders. We are offering help to developers and backers to help us with the development of our game. Farlanders: Game Game Features: • Hand-drawn sprite, 16 bit graphics and 8 bit music • Unique music and sound • Intuitive level design • Simple but cute platformer gameplay Farlanders: Pre-Alpha Farlanders is a action-adventure platformer game. The main difference with the classic platformer games is that we have a fully 3D engine. This game will be the first game to use a 3D engine. The game will be developed with the Unity engine. We are sure that we can make a game with unity. We need a lot of work in the coding. We are approaching to our first version of the game. It will be the pre-alpha version of the game. We are planning to release the first version in the middle of 2017. Kickstarter Risks and challenges We have developed the game in Unity engine, which is one of the most powerful engines for game development. But Unity is still growing and changing. Some times it happens that you can't make the things you want. We will need time and a lot of work to make this game a success. We will be making a sandbox for developers to create levels. This way they can test their ideas. This will be the main challenge for our studio. We expect this project to take about six months of work. We hope to make this time with the support of our community. FILED
