DelhiSafari2dualaudiohindi720p DelhiSafari2dualaudiohindi720p Mum Prima Application 2019 Crack.rarQ: Wrapper around TextFile.WriteLine() I have a TextFile in a WPF app with thousands of lines. This file is read many times and modifications are made to some of the lines. As it is, a simple WriteLine() call is quickly the bottleneck of the app when reading this file. This is what I have:

```
Thread thr; private void text_Loaded(object sender, RoutedEventArgs e) { if (thr == null) thr = new Thread(new ThreadStart(ReadSourceFile)); thr.Start(); } private void ReadSourceFile() { List list = new List(); StreamReader read = new StreamReader(...); while (true) { string line = read.ReadLine(); if (line != null) { list.Add(line); } else { break; } } } public void UpdateItems(List lines) { // more stuff Thread thr; if (thr == null) { thr = new Thread(new ThreadStart(WriteSourceFile)); thr.Start(); } thr.Join(); text.WriteLine(...); // Slow // more stuff } public void WriteSourceFile() { StreamWriter write = new StreamWriter(...); foreach (string line in lines) { write.WriteLine(line); }
```
